

Avery Lindqvist
Senior Full-Stack Engineer · Portland, OR
avery.lindqvist@folderit.net · <https://avery.folderit.net>

Summary

Full-stack engineer with eight years of experience building B2B web platforms with TypeScript, React and Node.js. I focus on reliable APIs, fast interfaces and teams that ship every week.

Experience

Senior Software Engineer — Halcyon Freight Co.

Mar 2021 – Present

- Led the rebuild of the shipment tracking dashboard in Next.js, cutting median load time from 4.2 s to 1.1 s.
- Designed REST APIs on Node.js and PostgreSQL that serve 12 million requests per day at 99.95% availability.
- Introduced Playwright end-to-end tests and GitHub Actions pipelines, reducing production incidents by 38%.
- Mentored 5 engineers and established a weekly code review practice across 3 teams.
- Migrated 40 services from EC2 to Docker containers on AWS ECS, saving \$180k per year.

Software Engineer — Quillmark Labs

Jun 2018 – Feb 2021

- Built a React and Redux document editor used by 30,000 monthly active users.
- Implemented GraphQL APIs with Apollo and Redis caching that reduced p95 latency by 60%.
- Responsible for the billing integration with the payments provider.
- Wrote unit tests with Jest, raising coverage from 45% to 82%.

Junior Developer — Ostrander Retail Group

Jan 2016 – May 2018

- Developed internal tools in JavaScript and PHP for 14 regional stores.
- Automated weekly inventory reports, saving the operations team 6 hours per week.

Skills

Languages: TypeScript, JavaScript, SQL, Python

Frontend: React, Next.js, Redux, Tailwind CSS, accessibility (WCAG)

Backend: Node.js, Express, REST APIs, GraphQL

Data: PostgreSQL, Redis, Prisma

Cloud and delivery: AWS, Docker, GitHub Actions, Terraform

Testing: Playwright, Jest, Vitest

Education

B.S. Computer Science — Meridian Grove University, 2015

Projects

Open-source maintainer of a small form validation library with 1,200 stars.
