Professional summary

Data engineer with five years of experience designing reliable pipelines for analytics and forecasting teams.

Professional experience

Data Engineer — Tidewater Analytics

Aug 2022 – Present

- Built streaming ingestion with Kafka and Apache Spark processing 3 TB of events per day.
- Orchestrated 120 Airflow DAGs and introduced dbt models, cutting report preparation from 2 days to 3 hours.
- Reduced warehouse costs by 27% by partitioning and clustering the largest tables.
- Defined data quality checks that catch 95% of schema drift before it reaches dashboards.

Analytics Engineer — Brightpath Health Systems

Feb 2020 – Jul 2022

- Modeled clinical scheduling data in PostgreSQL for 40 clinics.
- Automated monthly reporting with Python and pandas, saving 30 analyst hours per month.
- Deployed pipelines in Docker with GitLab CI.

Technical skills

Python, SQL, Apache Spark, Kafka, Airflow, dbt, PostgreSQL, Docker, Linux, Git

Education

M.S. Data Science — Lakeshore Institute of Technology, 2019
